Company Profile

鹿児島から世界へ

From Kagoshima
to the world

About us

Our company was established in 1948 as a specialized manufacturer of leaf tobacco dryers and related equipment in Kagoshima Prefecture, a leading tobacco producing region in Japan.

Today, using the heat management technology accumulated through advancement in drying technology, we have developed driers for the agricultural livestock and fishery industries, as well as low temperature equipment and environmental equipment. Our products are used by customers both here in Japan and all over the world.

With “Development – Our Top Priority” as our motto, we will unflaggingly continue to strive to deliver technologies that will meet market demands and the needs of the times and world of industry.
